

Perplexity was founded in August 2022 by four co-founders:

1. Aravind Srinivas – CEO and AI researcher; previously worked at OpenAI.
2. Denis Yarats – Chief Technology Officer; previously an AI researcher at Meta.
3. Johnny Ho – Former engineer at Quora.
4. Andy Konwinski – Computer scientist, co-founder of Databricks, and professor at the University of California, Berkeley.

About the CEO: Aravind Srinivas

- Born in **Chennai, India**.
- Studied **Electrical Engineering** at Indian Institute of Technology Madras.
- Earned a Ph.D. in Computer Science from the University of California, Berkeley.
- Worked as an AI researcher at OpenAI before co-founding Perplexity.

Key Features of Perplexity

1. **AI-Powered Search**
 - Understands natural language questions.
 - Provides direct, conversational answers instead of only search results.
2. **Real-Time Web Search**
 - Searches the internet to retrieve the latest information.
 - Useful for news, current events, and recent developments.
3. **Source Citations**
 - Displays references and links to the websites used.
 - Helps users verify the accuracy of the information.
4. **Conversational Interface**
 - Supports follow-up questions.
 - Maintains context throughout a conversation.
5. **Research Assistance**
 - Summarizes articles, reports, and documents.
 - Helps with academic research and information gathering.
6. **Content Generation**
 - Assists in writing essays, emails, reports, blogs, and creative content.

7. Coding Support

- Generates code in multiple programming languages.
- Explains programming concepts and helps debug errors.

Advantages

- Provides accurate answers with source citations.
- Saves time by summarizing information.
- Useful for students, researchers, developers, and professionals.
- Supports both learning and productivity tasks.
- Easy to use with a simple conversational interface.

Limitations

- The quality of answers depends on the available web sources.
- AI-generated responses may occasionally contain inaccuracies.
- Some advanced features require a paid subscription.
- Internet access is needed for the latest information.

Applications

- Academic research
- Learning new topics
- Programming and debugging
- Writing and editing content
- Business research
- News and current affairs
- General knowledge and question answering
